

GRADUATE STUDIES CO-CURRICULAR WORKSHOPS

Some things in graduate school are inevitable.

Literature reviews, research papers, statistics...

Luckily, Graduate Studies is hosting a series of co-curricular workshops designed to help you succeed!

Available Workshops

Using Library Databases for Research

How to Write a Literature Review

Understanding Statistics

Writing a Research Paper

Understanding Statistics

Students will examine the statistics behind everyday activities in the quantification of the social sciences in the United States.

Mathematical skills and basic topics related to the understanding of probability and descriptive/inferential statistics will be emphasized.

Students may choose the module(s) most suitable to their needs, or elect to participate in all.

Module 1: Observational Study vs. Experimental Design

Monday, August 28th, 6:30-8:00 PM, L2.72.04

Module 2: Descriptive Statistics vs. Inferential Statistics

Thursday, August 31st, 7:00-8:30 PM, L2.72.04

Module 3: Organizing Data

Thursday, September 7th, 7:00-8:30 PM, L2.72.04

Module 4: Technical Report Writing and Statistics

Monday, September 11th, 6:30-8:00 PM, L2.72.04

Using Library Databases for Research

This hour-long workshop will focus on the specific databases appropriate for different subjects as well as general searching techniques to help facilitate your research process.

Thursday, August 24th, 5:15-6:45 PM, L2.72.04

Tuesday, September 5th, 5:15-6:45 PM, L2.72.04

How to Write a Literature Review

Discover how to choose the most relevant material, write the literature review and compile references, along with finding answers and solutions to common writing challenges.

Thursday, August 24th, 5:30-7:00 PM, L2.72.05

Wednesday, August 30th, 5:30-7:00 PM, L2.72.04

Writing a Research Paper

Learn how to narrow a research paper topic to a specific question, gather sources, organize your paper, and cite using the APA style.

Tuesday, August 29th, 5:30-7:15 PM, L2.72.04
