## PROFILE

I love education and mathematics. I work at an academic non-profit and have been teaching/tutoring for over 5 years. My *primary goal* is to present you with the means to most easily progress from your point A to your point B. I believe in providing my learning partners with two things: well-packaged, easy-to-follow, logical explanations — and workable examples of direct real-world applications.

Your goals are achievable. Let's reach them together.
