The Master's Student Research Group (MSRG) is an organization of current MA Forensic Psychology graduate students who work to facilitate and promote student research at the graduate level. The MSRG also act as a liaison between the undergraduate, masters, and doctoral student body, as well as faculty.

Charles B. Stone is an Associate Professor in the Psychology Department. Dr. Stone's publications have dealt with the formation and maintenance of collective memories, mnemonic consequences of silence, intergenerational transmission of memories, the mnemonic consequences associated with denials, social media and memory and jury deliberations. Currently, he is an Associate Editor for the American Psychology-Law Society and the journal, Applied Cognitive Psychology. He has received internationally competitive fellowships to conduct international research in Belgium (2017) and Australia (2017). He has also been an expert witness for a number trials.

When: October 24, 2019
Time: 1:40-2:50 p.m.
Where: L2.85, New Building

All R&C Community events are open to the entire John Jay College community!

The John Jay College Research & Creativity Community consists of established programs and initiatives that serve undergraduate and graduate students in their pursuit to conduct in-depth, long-term research or creative projects with faculty. The Community offers research/creative related as well as professional development workshops that are crucial for students’ successful entry into the workforce and competitive Ph.D. programs.
