An **ePortfolio**, or electronic portfolio, is essentially your own web site, but it is so much more. ePortfolios document your growth over time from your first semester at John Jay through graduation. They demonstrate the skills you’ve acquired and showcase your achievements in and out of the classroom.

**Build and master our ePortfolio tool, Digication, in three sessions:**

1. **Essentials Workshop 1**
   - **Getting started**
   - Create and begin editing your own ePortfolio

2. **Essentials Workshop 2**
   - **Intermediate**
   - Take your existing ePortfolio to another level and learn how to customize it with images, colors and fonts that align to your goals and demonstrate your personality

3. **Essentials Workshop 3**
   - **Advanced**
   - Learn how to make the system work for you by embedding all kinds of interactive tools into your ePortfolio and even learn some programming language code

**Want to sign up?**
