Security Management

2013-2014

Security Management

Bachelor of Science

The major in Security Management concentrates on the analysis of security vulnerabilities and the administration of programs designed to reduce losses in public institutions and private corporations. The program prepares students for careers as managers, consultants and entrepreneurs.

Learning Outcomes. Students will:

- Critique and evaluate the origins and current structure of security management within corporations, not-for-profit institutions, and the government.
- Discern and differentiate concepts of situational crime prevention, rational choice theory, and criminological tenets to understanding crime and to evolving countermeasures for the control of loss and disorder.
- Weigh and assess common areas of occupational proficiency for security executives: data protection, emergency planning and response, homeland defense, and legal liability.
- Discover and apply tools to be effective in achieving those goals, particularly in areas where current practices are deficient, such as information protection, security technology, legal justice, and safety services.
- Develop, support, and enhance writing and verbal communications skills through relevant classroom assignments.

Credits required. 39

Prerequisites. ECO 101 and SOC 101. SOC 101 can fulfill the College's general education requirements in the Flexible Core: Individual and Society area.

Coordinator. Professor Robert McCrie, Department of Security, Fire and Emergency Management (212.237.8386, rmccrie@jjay.cuny.edu).

Additional information. Students enrolled for the first time at the College in September 2013 or thereafter must complete the major in the form presented here. Students who enrolled prior to that date may choose the form shown here or the earlier version of the major. A copy of the earlier version may be obtained at the Office of Undergraduate Studies or at the Lloyd George Sealy Library.
