| PROJECT NAME: | CLASSROOM TECHNOLOGY UPGRADES | | |
| DEPARTMENT: | CLASSROOM & LAB SUPPORT SERVICES (CLSS) | | |
| EXPECTED START DATE: | 7/1/21 | Expected End Date: | 6/30/22 |
| PROJECT LEADER: | ZENOBIA PETERSEN | | STAFF |
| PROPOSED BUDGET: | \$534,500 | | |
| Project Description: | | | |
| <p>The purpose of this proposal has been expanded to include technology upgrades in teaching and learning spaces on campus. CLSS plans to upgrade as many spaces as possible in the New Building and North Hall. Spaces will be upgraded on a rolling basis, as scheduling permits, throughout the fiscal year. Equipment in the new building classrooms are over 10 years old and are in desperate need of replacement. By upgrading these rooms to the current college standard, all faculty and students will continue to have _ seamless classroom experience. Through this enhancement, CLSS will be better placed to provide the resources needed for studentq and faculty teaching,</p> | | | |

| | | | |
|---|---|---------------------------|--------------|
| PROJECT NAME: | CONVERSATIONAL AI CHABOT | | |
| DEPARTMENT: | DEPARTMENT OF INFORMATION TECHNOLOGY (DoIT) | | |
| EXPECTED START DATE: | 7/1/21 | EXPECTED END DATE: | 6/30/22 |
| PROJECT LEADER: | JOSEPH LAUB | | STAFF |
| PROPOSED BUDGET: | \$40,000 | | |
| PROJECT DESCRIPTION: | | | |
| <p>DoIT along with a cross-divisional John Jay team seeks to deploy a conversation Artificial Intelligence (AI) system to automate responses to student support queries. It is expected that students will engage the system through various communication channels anytime day or night. This project will provide a number of benefits. First, conversational AI will improve service to students by providing automated and adaptive responses to the most commonly asked questions. Second, the system will relieve the burden on student support groups and allow their efforts to focus on more complex questions and concerns. Finally, the project will provide the college with critical information and data around student needs to better adjust our offerings.</p> | | | |

| | | | |
|---|---|---------------------------|--------------|
| PROJECT NAME: | HYFLEX CLASSROOM PILOT | | |
| DEPARTMENT: | DEPARTMENT OF INFORMATION TECHNOLOGY (DoIT) | | |
| EXPECTED START DATE: | 7/1/21 | EXPECTED END DATE: | 6/30/22 |
| PROJECT LEADER: | JOSEPH LAUB | | STAFF |
| PROPOSED BUDGET: | \$45,000 | | |
| PROJECT DESCRIPTION: | | | |
| <p>A number of faculty have expressed interest in piloting Hyflex learning at John Jay. HyFlex gives faculty members the option to return to the classroom while still supporting students who are learning remotely. A subset of students in Hyflex pilot course(s) may be given the option to engage in one of two modes.</p> <p>These include:</p> <ul style="list-style-type: none"> - Participating in face-to-face synchronous class sessions in-person (in a classroom) - Participating in face-to-face class sessions via video conference - Participating in international programs <p>This project seeks to outfit HyFlex pilot classrooms with needed technology to capture real-time instruction. Examples include microphones; instructor and document cameras; touchpads/smartboards; laptops, etc. CLSS will also set aside specific staff hours to provide faculty in pilot classes additional HyFlex technical support.</p> | | | |

| | | | |
|---|---|---------------------------|--------------|
| PROJECT NAME: | WIRELESS EXPANSION | | |
| DEPARTMENT: | DEPARTMENT OF INFORMATION TECHNOLOGY (DOIT) | | |
| EXPECTED START DATE: | 7/1/21 | EXPECTED END DATE: | 6/30/22 |
| PROJECT LEADER: | O'NEIL HINDS | | STAFF |
| PROPOSED BUDGET: | \$100,200 | | |
| PROJECT DESCRIPTION: | | | |
| <p>The John Jay College Department of Information Technology provides campus-wide Wi-Fi coverage to the college community. There is a need for high bandwidth Internet connection as Web 3.0 is interaction-based verse Web 2.0 which is virtually one-way delivery. Pictures, videos and video conferencing application are constantly be used on both a personal and professional level by our students. Bring You Own Devices (BYOD) such smartphone, tablets and laptops are powerful and are able to stream HD quality videos/movies. This place a high demand on our wireless network infrastructure. We have reach another point wherein some of our wireless access are end-of-life and end-of-support. Student are carrying 2 to 3 and sometimes even four Wi-Fi enabled devices. Our new goal to increase the capacity and bandwidth so that our students have the same experience they get on John Jay wired infrastructure. This will empower students to do their assignments/research from anywhere on campus. The new Cisco Wi-Fi 6 generation access point will provide this necessary expansion of the service and increase capacity.</p> <p>We are requesting funding for Cisco Catalyst 9100 wireless access points. The following justifies the request:</p> <ul style="list-style-type: none"> • Each access point will carry about forty devices without latency and bandwidth degradation. Therefore, it is imperative that we increase the access point count to support the demand. • Secondly, older access points will be drop from the controller if we perform software upgrades to the controllers. In the near future, this could cause the whole system to become vulnerable. | | | |

| | | | |
|--|---------------------|---------------------------|---------|
| PROJECT NAME: | JOBX AND TIMESHEETX | | |
| DEPARTMENT: | FINANCIAL AID | | |
| EXPECTED START DATE: | 7/1/21 | EXPECTED END DATE: | 6/30/22 |
| PROJECT LEADER: | VINCENT PIZZUTI | STAFF | |
| PROPOSED BUDGET: | \$14,000 | | |
| PROJECT DESCRIPTION: | | | |
| <p>The purpose of this proposal is to obtain funding to continue licensing two NextGen web-based multifunctional student employment systems (JobX & TimesheetX). These systems assist in the administration of the Federal Work Study (FWS) program and will benefit students who receive a Federal Work-Study offer by connecting them with a participating employer while providing a seamless electronic employment onboarding, and electronic timesheet/payroll administration.</p> <p>In addition to the highlighted points above there are many pros to the continual utilization of these resources implemented for Federal Work-Study students.</p> <ul style="list-style-type: none"> - The system makes the federal work study program paperless - The system houses both on and off campus - Payroll processing one system, payroll integration - Email reminders for timesheets to supervisors and students - Supervisors can maintain awards - Students have real time access to information Online timesheets, Award Balance Tracking, Wage management | | | |

| | | | |
|--|-----------------|---------------------------|--------------|
| PROJECT NAME: | DYNAMIC FORMS | | |
| DEPARTMENT: | FINANCIAL AID | | |
| EXPECTED START DATE: | 7/1/21 | EXPECTED END DATE: | 6/30/22 |
| PROJECT LEADER: | VINCENT PIZZUTI | | STAFF |
| PROPOSED BUDGET: | \$8,000 | | |
| PROJECT DESCRIPTION: | | | |
| <p>The purpose of this tech fee proposal is request financial assistance in the amount of \$8000 for the renewal of a web-based solution called Dynamic Forms. Dynamic Forms (a NextGen product) is a product that will assist in the collection and processing of various financial aid documents and related information. Document collection and processing is an essential part of ensuring that the Financial Aid Office remains in compliance with various Federal and State regulations as it relates to awarding of Financial Aid. The Financial Aid Office assists in the certification of approximately \$105 Million in annual awards from various forms of Student Financial Assistance programs. This increases access to economically disadvantaged students. The need for a secure online form submission software has proven to be essential to the campus especially when remote administration is required.</p> <p>The Dynamic Forms product will:</p> <ul style="list-style-type: none"> Provide a reduced reliance on the collection of paper documents that are needed in conjunction with awarding students Financial Aid funds. Allow students to securely submit sensitive information from virtually anywhere they may have internet connection. Enable the Financial Aid and Jay Express staff to remotely access the submitted Financial Aid files. Room for potential increase capabilities for implementation and use by other college wide departments. <p>Beginning with the 2019-2020 academic year the Financial Aid Office has started to roll out the use of the Dynamic Forms solution and have seen great success in student submissions. We hope for continued support in offering this option to our students. For more information please visit:</p> <p>https://www.ngwebsolutions.com/dynamic-forms/</p> | | | |

| | | | |
|--|---------------------------------|---------------------------|--------------|
| PROJECT NAME: | SCHOLARSHIP MANAGEMENT SOFTWARE | | |
| DEPARTMENT: | FINANCIAL AID | | |
| EXPECTED START DATE: | 7/1/21 | EXPECTED END DATE: | 6/30/22 |
| PROJECT LEADER: | MICHAEL SCADUTO | | STAFF |
| PROPOSED BUDGET: | \$6,750 | | |
| PROJECT DESCRIPTION: | | | |
| <p>I am submitting a proposal for the renewal of scholarship management software. The Office of Scholarships has experienced great success over the past several years. The total amount of scholarships awarded has increased to nearly a million dollars annually, benefiting hundreds of students. Our undergraduate and graduate students can now apply to over 80 different scholarship opportunities, many with multiple awards. These scholarships recognize strong academics, foster student research, and allow our students access to special opportunities such as internships and studying abroad. An online application has been a necessity, especially in light of the COVID-19 pandemic and remote work.</p> <p>Nationally, scholarship programs (both university and private foundations) are utilizing web-based scholarship management programs. Scholarship management programs provide a comprehensive automated solution to the scholarship process. Such software would offer a considerable update in access and improved services to our students, faculty, and larger community. It will help to streamline the application, award process, and stewardship.</p> <p>In 2019, we transitioned to a new scholarship management platform, Next Gen - Scholarship Manager, which was graciously covered through support from the Student Tech Fee. Next Gen provided us with some additional features and since it was already in use at other CUNY campuses, came at a discounted rate. We are requesting support for the 2021/22 at a cost of \$6,750.00.</p> <p>https://www.ngwebsolutions.com/scholarship-manager/</p> | | | |

| | | | |
|---|----------------------------------|---------------------------|--------------|
| PROJECT NAME: | FACULTY FELLOW - ONLINE TEACHING | | |
| DEPARTMENT: | INSTITUTIONAL EFFECTIVENESS | | |
| EXPECTED START DATE: | 7/1/21 | EXPECTED END DATE: | 6/30/22 |
| PROJECT LEADER: | ALLISON PEASE | | STAFF |
| PROPOSED BUDGET: | \$18,300 | | |
| PROJECT DESCRIPTION: | | | |
| <p>This is a one-time request to support a Faculty Fellow in Online Teaching in the 2021-2022 academic year. This professor will work with both the Teaching and Learning Center and the Department of Online Education and Support to offer intermediate and advanced training to faculty for online teaching, as well as biweekly workshops for all John Jay faculty looking to improve student engagement in their online courses, whether synchronous or asynchronous. TLC/DOES piloted a version of this role in Spring 2019 through Summer 2020, supported by one-time Student Tech Fee and TLC funding. Faculty response to the three seminars (48 faculty) was enthusiastic, and the newsletter has grown to 233 subscribers.</p> <p>As we continue to offer courses remotely, it is clear we need more faculty support and development for our 1383 faculty. Last year we provided basic skills in online teaching workshops to 400 John Jay professors, bringing our total number of faculty certified to teach online up to 650. But faculty who have taken basic training are now asking how to incorporate the pedagogies most effective for their disciplines and our student needs into their online courses. Intermediate and advanced opportunities to do these with experienced faculty have proven the best way to advance the teaching and learning experience. In fact, Professor Edward Kennedy, winner of the 2021 Distinguished Teaching Prize, credits his “engaging students online” workshop with the 2019-20 Faculty Fellow with his online teaching success.</p> | | | |

| | | | |
|--|---------------------------------|---------------------------|--------------|
| PROJECT NAME: | EPORTFOLIOS | | |
| DEPARTMENT: | OFFICE OF UNDERGRADUATE STUDIES | | |
| EXPECTED START DATE: | 7/1/21 | EXPECTED END DATE: | 6/30/22 |
| PROJECT LEADER: | SUMAYA VILLANUEVA | | STAFF |
| PROPOSED BUDGET: | \$33,750 | | |
| PROJECT DESCRIPTION: | | | |
| <p>John Jay College fully transitioned into distance learning and remote work in the middle of Spring 2020 semester due to the COVID-19 pandemic and has remained online throughout 2020-2021 academic year. The ePortfolio team has been supporting faculty and students throughout the entire remote learning and working experience and were particularly adept at helping less digitally prepared members of our community from day one.</p> <p>With most courses fully online, digital tools such as Digication ePortfolio have proven particularly useful. Over 120 courses have used ePortfolio to document and assess students' learning. The students in these courses created ePortfolios to upload their assignments, reflect on their work, and showcase their achievements. Through creative use of ePortfolio, students expand their digital footprint and can improve their online presence—a crucial skill in the current virtual environment. A recent prime example of the creative use of online tools for personal and collaborative learning in real time, was Prof. Yarbrough's Law & Society capstone course in Spring 2020. The class created a group ePortfolio project titled "Covid-19 at CUNY: A Class Project" that documented the students' experience during the pandemic. This project contained dairy entries of each of the students through the start of the pandemic in March up to their graduation in May. They effectively used all the audio-visual functions of Digication to its full potential to tell their stories. This class ePortfolio currently has recorded 6,000 site visits.</p> <p>The evidence of ePortfolio effectiveness is prolific, which led the AAC&U to add ePortfolio as a high impact practice in 2016 (https://www.aacu.org/eportfolios). ePortfolios engage students in self-reflective practices that promote intellectual and personal growth across curricular and co-curricular experiences (Chen and Mazow, 2002; Chen, Cannon, Gabrio, & Leifer, 2005; Chen, 2009; Light, Chen, & Ittelson, 2012). These digital tools support planning for professional and academic goals and the ability to showcase students' achievements and workforce readiness skills.</p> <p>To support students documenting their learning and achievements via ePortfolio, faculty who have adapted their pedagogy to incorporate this high-impact practice, and track student progress for more than 120 unique John Jay courses, we seek recurring tech fee funds to purchase 4,500 student licenses for the 2021-22 Academic Year.</p> | | | |

| | | | |
|---|---|---------------------------|--------------|
| PROJECT NAME: | STI/UWI/SCIENCE DIRECT | | |
| DEPARTMENT: | DEPARTMENT OF INFORMATION TECHNOLOGY (DoIT) | | |
| EXPECTED START DATE: | 7/1/21 | Expected End Date: | 6/30/22 |
| PROJECT LEADER: | JOSEPH LAUB | | STAFF |
| PROPOSED BUDGET: | \$789,936 | | |
| Project Description: | | | |
| <p>The STI/UWI/SciDirect is a recurring project that provides an allocation to cover a portion of the technology charges incurred at the university level. In most cases, central procurement provides lower costs for these software and services. John Jay DoIT presents these charges each year to the Student Technology Fee Committee to ensure transparency. This project is being submitted to provide details on the anticipated charges for FY2021-2022. These include:</p> <ul style="list-style-type: none"> 100% of Strategic Technology Initiative (STI) journal that funds centrally managed student technology projects if it is charged 100% of the Course Management System (Blackboard) and Video Conferencing (Zoom) charges 100% of the SPSS, SAS, Maplesoft and Mathworks charges 100% of the Enterprise Training service charge 100% of the Turnitin charge 100% of Proquest RefWorks charge 100% of Browsealoud charge 50% of Antispam (Proofpoint) charge 100% of Palo Alto Firewall charge 50% of the McAfee charge 50% of the Adobe charge 50% of the Microsoft charge \$84,043 of the Science Direct charge | | | |
