

Message from President Mason: Stay Calm, Wash Your Hands, & Stay Home If You're Sick

Novel Coronavirus (COVID-19) Alert

Students who have been exposed to the Novel Coronavirus (COVID 19) or those who have been in extended close contact with a person under medical care for the virus, should not come to campus under any circumstances.

If You Feel Sick At Home:

Those who have a fever, in addition to a cough or difficulty breathing, should seek medical care close to home. Call ahead to the clinic/facility and report your situation; keep your hands clean by washing with soap and water (and using alcohol-based hand sanitizer if available); cough into your bent elbow or use a tissue (not your hands); and don't touch your face if you can avoid it. Remember, hospital staff will not ask about your immigration status or deny care based on your ability to pay. After being assessed by a medical provider, remain at home until you are well.

If You Feel Sick On Campus:

If you are a student, and develop a fever and respiratory symptoms while on campus, report to the John Jay Wellness Center (L.68) immediately. If you begin to feel sick on your way to campus, cover your nose/mouth, and seek care at the closest Urgent Care or an Emergency Room.

Additional Information & Help:

After reviewing the information contained in the links below, students who are unsure if they should stay at home or return to school, may email the Campus Nurse Practitioner at NP@jjay.cuny.edu. Include full name, date of birth, EmplID, and phone number for a timely response.
