

Unsure if your current major is the one for you? Like your major but have some questions? Chat with your major advisor! Here are some great starting-off points...

- What do students find most rewarding about this major?
- What tends to be the biggest challenge for students in this major?
- What is one thing that students interested in this major should know before getting into the major?
- Which courses would you suggest I start with to help me decide if this is the right major for me?
- Can you provide any insight into the following courses (list specific courses) aside from what I have read in the course descriptions?
- Are there any courses that you recommend (or do not recommend) taking at the same time?
- Which minors are good complements to this major? Are there any other related courses that you would recommend I explore as electives?
- What information can you provide about internship opportunities within this major? Are there any other opportunities, clubs, or activities associated with this major?
- What do students in this major typically do after graduation? Are there specific career paths that they tend to follow or graduate school programs that are popular for this major?
- What do you enjoy most about this field of study?
