Online Lecture:  
W 12.15-1.30 PM [here]

Optional office hours:  
M 12.15-1.30 PM [here] (except when there are no classes scheduled on Monday)

Textbook:  
An Introduction to Macroeconomics: A Heterodox Approach to Economic Analysis by Louis-Philippe Rochon and Sergio Rossi

Course Description

The field of economics has been in disarray since the Great Recession. The pandemic and the following political and economic downfall once again proved that the contemporary mainstream economics is not only inadequate in describing real world, but it is also inadequate in addressing large scale crises of mass death, starvation, and depravation. In the light of the current crisis, this course will provide an introductory and critical examination orthodox and heterodox traditions of contemporary Macroeconomics. Traditionally, Macroeconomics is the study of economics focusing on the aggregate trends within the national economies, and the role of the state in regulating these trends. We will examine different theoretical conceptions of markets,
financial systems, international trade, and the role of the government in regulating each. The course will follow a historical and “class-centric” approach to critical analysis of various economic theories.

Learning Goals
❖ An understanding of the central concepts and models in Macroeconomics
❖ An overview of some debates in Macroeconomic policy
❖ The skills and literacy to critically engage with these debates

Evaluation and Assessment
The grading scale will be the following (grades rounded to the nearest whole number):
A 100-93 % A- 92-90 %
B+ 89-87 % B 86-83 % B- 82-80 %
C+ 79-77 % C 76-73 % C- 72-70 %
D+ 69-67 % D 66-63 % D- 63-60 %
F Less than 60 %

There are four graded components of the course with equal weight (each make up 25% of the course grade):
❖ Participation in course discussions
❖ Weekly reading responses
  You should write a single page (double-spaced) reading response to an assigned prompt each week. The responses will be due every Monday with no late submissions. I will try to post my own notes on the readings before the due date every week. You can use my notes to make sense of the assigned readings. Only your best 11 out of 14 reading responses will contribute to your grade.
❖ A take-home theory exam
  The exam will have 4-5 macroeconomic models and will expect you to elaborate your understanding of these models. You can always contact me for your questions regarding the take-home exam.
❖ A six-page course response (also double spaced, due at the end of the semester) that you should write about a specific subject we covered in class. The course response should be a summary of how the perspectives taught in the course have reshaped your understanding of a specific concept of macroeconomics, or the field of economics itself. The course response must refer specifically to the topics and the perspectives we have covered in the class.

Schedule
We will only have one mandatory course call each week. These will be on Wednesdays at 12.15-1.30 PM and we will be discussing the assigned readings as well as your reading responses. The schedule of topics are as follows:

<table>
<thead>
<tr>
<th>Date</th>
<th>Subject</th>
<th>Readings</th>
<th>Due</th>
</tr>
</thead>
</table>

2
<table>
<thead>
<tr>
<th>Week 1: August 26</th>
<th>Individuals, Households, Firms, and the State</th>
<th>Chapter 1</th>
<th>Response due August 24</th>
</tr>
</thead>
<tbody>
<tr>
<td>Week 2: September 2</td>
<td>Classical Political Economy, Keynesianism and Neoclassical Economics</td>
<td>Chapter 2</td>
<td>Response due August 31</td>
</tr>
<tr>
<td>Week 3: September 9</td>
<td>Capital, Profits and “Turbulent Macrodynamics”</td>
<td><em>The First Great Depression of the 21st Century</em> and <em>Capital as a Social Relation</em> by Anwar M. Shaikh</td>
<td>Response due September 7</td>
</tr>
<tr>
<td>Week 4: September 16</td>
<td>Employment and Inflation</td>
<td>Chapter 8</td>
<td>Response due September 14</td>
</tr>
<tr>
<td>Week 5: September 23</td>
<td>Employment and Inflation 2</td>
<td><em>Explaining Inflation and Unemployment: An Alternative to Neoliberal Economic Theory</em> by Anwar M. Shaikh</td>
<td>Response due September 21</td>
</tr>
<tr>
<td>Week 6: September 30</td>
<td>Growth</td>
<td>Chapter 10</td>
<td>Response due September 28</td>
