

ADVANCED CERTIFICATE IN EMERGENCY MANAGEMENT STUDIES

This advanced certificate program offers advanced instruction related to the theory, legal structure, federal doctrine, and practice of emergency management. The program addresses the five phases of emergency management: prepare, respond, recover, mitigate, and prevent. It incorporates preparation for, response to, and recovery from both natural and man-made disasters. Both public and private perspectives are recognized.

Students must complete an introductory course, three courses in advanced emergency management topics and a 1-credit seminar course.

REQUIRED COURSES

Core Courses (10 Credits)

- PMT 711 Introduction to Emergency Management
- PMT 725 Seminar in Emergency Management & Response
- PMT 763 Emergency Management: Preparedness
- PMT 764 Managing Response to Large-Scale Incidents

Electives (3 Credits)
