

Criminal Justice (BS) Learning Objectives

1. Describe from a historical and systemic perspective criminal justice institutions and how they relate to each other.
2. Understand the mechanisms, dynamics and situational context of crime and criminal behavior, and methods of prevention and treatment.
3. Apply the theories related to the policy and practice of the criminal justice systems.
4. Analyze the operations and administration of criminal justice institutions in the context of public discourse.
5. Demonstrate critical thinking skills through verbal presentation, by articulating Standard English and by developing a coherent written argument, consistent with and building upon the goals of general education.
6. Demonstrate the ability to access, conduct, interpret and apply criminal justice research.
